OGBUE TOCHUKWU GERALD

Frontend Web Developer | Full-stack Development Track

Lagos, Nigeria ▪ 08146003479 ▪ ogbuetoochukwu6@gmail.com

PROFESSIONAL SUMMARY

Frontend Web Developer with hands-on experience building and contributing to responsive web interfaces using React, JavaScript, HTML, and CSS. Skilled in website design and development, implementing landing pages and providing recommendations for improving security of login and sign-up experience. Brings additional foundational knowledge in cybersecurity, vulnerability assessment, network analysis, and ethical hacking, creating a strong awareness of both usability and application security. Currently expanding backend development capabilities toward full-stack proficiency.

CORE COMPETENCIES

Frontend Development	Responsive Web Design	React
JavaScript	HTML5	CSS3
UI Implementation	Web Development	Website Optimization
Secure Web Design	Problem Solving	Debugging
Cybersecurity Fundamentals	Vulnerability Assessment	Network Analysis

PROFESSIONAL EXPERIENCE

TECH STUDIOS 2025 – Present

Frontend Web Developer | Full-Stack Development Track

- Contribute to the development of web applications using React, JavaScript, HTML, and CSS, translating design and functional requirements into usable front-end interfaces.
- Designed and developed the landing page for the Connectify website, contributing directly to the product's user-facing experience and overall digital presentation.
- Reviewed the proposed login and sign-up experience and recommended improvements intended to strengthen account security and reduce potential authentication-related risks.
- Collaborate on web-development tasks while building practical understanding of application structure, interface behavior, and user experience.
- Apply problem-solving and debugging skills to identify front-end issues and improve the functionality and presentation of web pages.
- Continue developing backend knowledge as part of a broader transition toward full-stack web development.

PROJECTS & COLLABORATIONS

CONNECTIFY WEBSITE
Frontend Development Contributor | 2026

- Designed and implemented the website's landing page, creating the primary entry point through which users interact with the platform.
- Contributed ideas to the structure and functionality of the login and registration process, with particular attention to improving security.
- Applied HTML, CSS, JavaScript, and React knowledge during the development process.
- Worked within a broader development effort, contributing both technical execution and product-improvement ideas.

HOME LAB – NETWORK VULNERABILITY ASSESSMENT
Tech Studios | 2025 – 2026

- Designed a basic network environment involving network segmentation and VLAN 10 and VLAN 20.
- Configured 802.1Q trunking between switches and a gateway router.
- Configured IP addressing and explored network architecture concepts applicable to secure infrastructure.
- Used the project to strengthen understanding of network configuration, segmentation, and security fundamentals.

VULNERABILITY ASSESSMENT & EXPLOITATION OF METASPLOITABLE2
Tech Studios | 2025 – 2026

- Conducted system enumeration and vulnerability scanning using Nmap.
- Performed vulnerability assessments using Nessus to identify potential security weaknesses.
- Executed controlled exploitation scenarios within the Metasploitable2 lab environment.
- Analyzed findings and documented identified vulnerabilities and assessment results.
- Applied ethical-hacking and penetration-testing principles within a controlled learning environment.

SOCIAL ENGINEERING & PHISHING ANALYSIS PROJECT
Tech Studios | 2025 – 2026

- Created controlled phishing simulations for cybersecurity learning and analysis.
- Used Wireshark and Hex Editor to inspect technical information associated with simulated attack scenarios.
- Analyzed multiple emails to identify indicators commonly associated with phishing attempts.
- Strengthened practical understanding of social-engineering risks and user-focused security threats.

INCIDENT RESPONSE PROJECT
Tech Studios | 2025 – 2026

- Analyzed simulated complex data-breach scenarios to understand incident-response requirements.
- Conducted legal and regulatory research related to cybersecurity incidents.
- Developed communication material addressing public-relations considerations following a security incident.

EDUCATIONAL BACKGROUND

Bachelor of Science (B.Sc.), Accounting **2020 – 2024**
Chukwuemeka Odumegwu Ojukwu University

PROFESSIONAL TRAINING & LICENSES

Javascript Full-stack Web Development Course **2025 – 2026**
Tech Studios Academy

Cybersecurity Fundamentals Course **2025 – 2026**
Tech Studios Academy

TECHNICAL SKILLS & SOFTWARE

Web Development: React, JavaScript, HTML5, CSS3

Cybersecurity: Kali Linux, Nmap, Nessus, Metasploit, Wireshark

Security Concepts: Vulnerability Assessment, Network Traffic Analysis, Threat Detection, Log Analysis, Risk Assessment

Development Strengths: Frontend Development, Responsive Design, Debugging, Problem Solving
